

Die Repair is critical in helping our presses operate in an efficient manner.

### **REQUIRED KNOWLEDGE / EXPERIENCE:**

- 2+ years of hard alloy aluminum extrusion experience (press experience is helpful but not required).
- Able to read and use measuring tools such as calipers, gages, & micrometers.
- Able to understand prints and apply tolerances.
- Good organization skills and attention to detail.
- Work effectively in a team environment.

### **RESPONSIBILITIES / AUTHORITIES:**

- Assist our Extrusion Manager as needed to ensure our press department's ability to operate efficiently.
- Work with the press department to ensure tools are available when needed and assist at the press as needed.
- Evaluate press tooling for required maintenance or replacement.
- Assist with press tooling inventory.
- Inspect new dies to ensure they meet requirements, correct & repair dies as needed, & clean used dies to get them ready for storage.
- Understand and follow QMS and EHS requirements as they relate to the Die Repair department.
- Work with applicable personnel and teams to improve processes.
- Foster a positive culture.
